Index of Subjects

Adenoviruses, faecal, from Glasgow babies, 463
Animal feeding stuffs, influence of multiple plating from fluid media on salmonella isolation from, 113
Antibody capture radioimmunoassay, the development and use of an, for specific IgM to a human parvovirus-like agent, 309

Bacterial flora, of neonates with congenital abnormalities of the gastro-intestinal tract, 69
Bacterial meningitis – ten years experience, 383
Bed centre, a hygienic hazard in hospital? 143
Bordetella pertussis, a reappraisal of serotype factors 4, 5 and 6 of, 39
Bordetella pertussis, rabbit nasopharyngeal colonization by: the effects of immunization on clearance and on serum and nasal antibody levels, 475
Brucella abortus, a modified radioimmunoassay for antibodies against, 1
Brucella, enzyme immunoassay of the antibody response to infections in humans, 295
Brucella serology, a comparison of the results of the brucellosis radioimmunoassay and other serological tests in experimentally infected cattle, 21
Brucellosis, the serological response of cattle to vaccines against, as measured by the brucellosis radioimmunoassay and other tests, 11
Burns unit, hospital-acquired infections in a, caused by an imported strain of *Staphylococcus aureus* with unusual multi-resistance, 535

Campylobacter enteritis in general practice, 155
Campylobacter jejuni and salmonella in raw red meats, 29
Campylobacter jejuni, comparison of agglutination, complement fixation and immunofluorescence tests in, infections, 165
Campylobacter jejuni, the heat-sensitivity of, in milk, 529
Canned fish, scombrotoxin and scombrotoxin-like poisoning from, 215
Cattle feed, transmission of *Salmonella mbandaka* to cattle from contaminated feed, 255
Chronic active hepatitis, characterization of measles virus-specific antibodies in sera from patients with, 519
Colonization resistance, effect of twelve antimicrobial drugs on the, of the digestive tract of mice and on endogenous potentially pathogenic bacteria, 221
Cooling water systems, *Legionella pneumophila* in, 369
Congenital abnormalities of the gastro-intestinal tract, the bacterial flora of neonates with, 69
Corynebacterium ulcerans, the exotoxins of, 173
Cytomegalovirus, antibody to, in Malta, 355

Digestive tract, effect of twelve antimicrobial drugs on the colonization resistance of the, of mice and on endogenous potentially pathogenic bacteria, 221
Drinking water, the sanitary condition of rural, in a Nile Delta village. I. Parasitological assessment of 'zir' stored and direct tap water, 57
Drinking water, the sanitary condition of rural, in a Nile Delta village. II. Bacterial contamination of drinking water in a Nile Delta village, 63

Egypt, the sanitary condition of rural drinking water in a Nile Delta village. I. Parasitological assessment of 'zir' stored and direct tap water, 57
Egypt, the sanitary condition of rural drinking water in a Nile Delta village. II. Bacterial contamination of drinking water in a Nile Delta village, 63

Enterotoxigenicity of strains of *Escherichia coli* isolated from the faeces of healthy people and cattle, 121
Enterotoxin A and B production in strains of *Staphylococcus aureus* isolated from human beings and foods, 103
Enzyme immunoassay of the antibody response to Brucella and *Yersinia enterocolitica* 09 infections in humans, 295
Escherichia coli, a medium for the rapid enumeration of, in the presence of other faecal coliforms in tropical waters, 265
Escherichia coli, serotypes of, isolated from patients with recurrent pyogenic cholangitis, 513
Escherichia coli, the biotyping of, isolated from healthy farm animals, 543
Escherichia coli, the enterotoxigenicity of strains of, isolated from the faeces of healthy people and cattle, 121
Escherichia coli, the survival of multi-antibacterial drug-resistance, and *Salmonella typhimurium* in stored static slurry from a veal calf unit, 557
Escherichia coli, virulence of urinary and faecal, in relation to serotype, haemolysis and haemagglutination, 567
Ethiopa, *Shigella* species from Addis Ababa: frequency of isolation and *in vitro* drug sensitivity, 47
Exotoxins of *Corynebacterium ulcerans*, 173

Faecal adenoviruses from Glasgow babies, 463

Gastroenteritis, an outbreak of, caused by both rotavirus and *Shigella sonnei* in a private school in Rio de Janeiro, 285
Group A streptococci, why type streptococci? The epidemiology of, in Oxfordshire 1976–1980, 439

Hamburgers, microbiological studies on, 125
Hepatitis A virus, an outbreak of infectious hepatitis investigated using radioimmunoassays for, antibody, 351
Hydrotherapy pools treated, hospital, with ultra violet light: bad bacteriological quality and presence of thermophilic *Naegleria*, 205

Immunization, rabbit nasopharyngeal colonization by *Bordetella pertussis*: the effects of, on clearance and on serum and nasal antibody levels, 475
India, characterization of resistance plasmids and carried phages in an epidemic clone of multi-resistant *Salmonella typhimurium* in, 193
Infectious hepatitis, an outbreak of, investigated using radioimmunoassays for hepatitis A virus antibody, 351
Influenza B, quantitation and analysis of the specificity of post-immunization antibodies to, viruses using single radial haemolysis, 325
Influenza in the United Kingdom 1977–1981, 501
Influenza surveillance in England and Wales using routine statistics, 83
Italy, antimicrobial resistance among salmonella isolates from hospitals in Rome, 275

Kenya, observations on the epidemiology of lumpy skin disease in, 95

Legionella pneumophila in cooling water systems, 369
Lumpy skin disease, observations on the epidemiology of, in Kenya, 95

Malta, antibody to cytomegalovirus in, 355
Measles, characterization of, virus-specific antibodies in sera from patients with chronic active hepatitis, 519
Milk, the heat-sensitivity of *Campylobacter jejuni* in, 529

Monoclonal antibodies, the production of, to rubella haemagglutinin and their use in antibody-capture assays for rubella-specific IgM, 335
Monoclonal antibodies, the use of, in virology, 361

Naegleria, hospital hydrotherapy pools treated with ultra violet light: bad bacteriological quality and presence of thermophilic, 205
Nasal antibody, rabbit nasopharyngeal colonization by *Bordetella pertussis*: the effects of immunization on clearance and on serum and, levels, 475
Nasal, a survey of, *Streptococcus pneumoniae* in children, 425
Nasal staphylococci in children – a follow-up study, 433
Neonates, the bacterial flora of, with congenital abnormalities of the gastro-intestinal tract, 69
Non-sporeforming anaerobic bacteria, dispersal of, from the skin, 487

Parvovirus-like agent, the development and use of an antibody capture radioimmunoassay for specific IgM to a human, 309
Phages, characterization of resistance plasmids and carried, in an epidemic clone of multi-resistant *Salmonella typhimurium* in India, 193
Plasmids, characterization of resistance, and carried phages in an epidemic clone of multi-resistant *Salmonella typhimurium* in India, 193

Radioimmunoassay, a comparison of the results of the brucellosis, and other serological tests in experimentally infected cattle, 21
Radioimmunoassay, a modified, for antibodies against *Brucella abortus*, 1
Radioimmunoassay, the serological response of cattle to vaccines against brucellosis, as measured by the brucellosis, and other tests, 11
Recurrent pyogenic cholangitis, serotypes of *Escherichia coli* isolated from patients with, 513
Red meats, *Campylobacter jejuni* and salmonella in raw, 29
Rotavirus, an outbreak of gastroenteritis caused by both, and *Shigella sonnei* in a private school in Rio de Janeiro, 285
Rubella antibody screening, 149
Rubella-specific IgM, the detection of, by an immunosorbent assay with solid-phase attachment of red cells (SPARC), 453
Rubella-specific IgM, the production of monoclonal antibodies to rubella haemagglutinin and their use in antibody-capture assays for, 335
Rubella, the production of monoclonal antibodies to, haemagglutinin and their use in antibody-capture assays for rubella-specific IgM, 335

Salmonella agona, differential typing of: type divergence in a new serotype, 413
Salmonella, antimicrobial resistance among, isolates from hospitals in Rome, 275
Salmonella, *Campylobacter jejuni* and, in raw red meats, 29
Salmonella, influence of multiple plating from fluid media on, isolation from animal feeding stuffs, 113
Salmonella mbandaka, transmission of, to cattle from contaminated feed, 255
Salmonella paratyphi A and *B*, the geographical distribution of *Salmonella typhi* and, phage types during the period 1 January 1970 to 31 December 1973, 231
Salmonella, the effect of time in lairage on the frequency of, infection in slaughtered pigs, 107
Salmonella typhi, the geographical distribution of, and *Salmonella paratyphi A* and *B* phage types during the period 1 January 1970 to 31 December 1973, 231
Salmonella typhimurium, characterization of resistance plasmids and carried phages in an epidemic clone of multi-resistant, in India, 193
Salmonella typhimurium, the survival of multi-antibacterial drug-resistance *Escherichia coli* and, in stored static slurry from a veal calf unit, 557
Salmonellas, isolations of, from human, food and environmental sources in the Manchester Area: 1976–1980, 403
Scombrotoxin and scombrotoxin-like poisoning from canned fish, 215
Screening, rubella antibody, 149

Serology, comparison of agglutination, complement fixation and immunofluorescence tests in *Campylobacter jejuni* infections, 165
Shigella sonnei, an outbreak of gastroenteritis caused by both rotavirus and, in a private school in Rio de Janeiro, 285
Shigella species from Addis Ababa: frequency of isolation and *in vitro* drug sensitivity, 47
Sickle-cell disease, the development and use of an antibody capture radioimmunoassay for specific IgM to a human parvovirus-like agent, 309
Single radial haemolysis, quantitation and analysis of the specificity of post-immunization antibodies to influenza B viruses using, 325
Skin, dispersal of non-sporeforming anaerobic bacteria from the, 487
Slaughtered pigs, the effect of time in lairage on the frequency of salmonella infection in, 107
Staphylococci, nasal, in children – a follow-up study, 433
Staphylococcus aureus, enterotoxin A and B production in strains of, isolated from human beings and food, 103
Staphylococcus aureus, hospital-acquired infections in a burns unit caused by an imported strain of, with unusual multi-resistance, 535
Streptococcus pneumoniae, a survey of nasal, in children, 425

Ultra violet light, hospital hydrotherapy pools treated with: bad bacteriological quality and presence of thermophilic *Naegleria*, 205

Vaccines, the serological response of cattle to, against brucellosis, as measured by the brucellosis radioimmunoassay and other tests, 11

Water, a medium for the rapid enumeration of *Escherichia coli* in the presence of other faecal coliforms in tropical waters, 265

Yersinia enterocolitica 09, enzyme immunoassay of the antibody response to Brucella and, infections in humans, 295
